

Wallowa-Whitman National Forest

Travel Management Plan DEIS – Comment Form

The Wallowa-Whitman National Forest (WWNF) Travel Management Plan (TMP) addresses the designation of roads, trails, and areas for motor vehicle use within the WWNF TMP project area. It identifies the issues associated with this project, describes the range of 6 alternatives developed to address those issues, and explores in depth the potential effects of implementing each of the alternatives. Your opinions and suggestions are important to help identify which of the alternatives present a reasonable balance between recreational opportunities, access, and resource protection, and/or whether a different combination of actions would create a better balance of opportunities and resource protection.

Please make your comments as specific as possible and, when possible, reference specific pages and/or topics contained in the DEIS.

Please sign, date, and fill out the appropriate information. Use additional sheets if necessary.
